PROFESSIONAL SUMMARY

Computer Science student (B.Tech, graduating 2026) with hands-on experience building real-time data pipelines, analytics platforms, and AI-powered systems. Currently interning at HCLTech in AI/LLM development. AWS Certified Cloud Practitioner with proven ability to design and deliver end-to-end technical solutions across Python, SQL, Docker, and cloud infrastructure. Strong communicator with demonstrated leadership managing a 50+ member technical community.

TECHNICAL SKILLS

Languages: Python, C++, SQL, JavaScript, PHP, HTML, CSS

Databases & Data Tools: MySQL, PostgreSQL, Apache Kafka, Apache Zookeeper, ETL/ELT pipelines, Metabase, Power BI

Cloud & DevOps: AWS (EC2, S3, IAM), Docker, Git, GitHub, CI/CD, Linux, version control

AI / ML: Large Language Models (LLMs), NLP, Generative AI, Prompt Engineering, BeautifulSoup, Selenium

Other: REST APIs, OOP, Agile, unit testing, system monitoring, technical documentation, Microsoft Excel

INTERNSHIP

AI LLM Development Intern | HCLTech

Mar 2026 – Present

- Completed structured training on Large Language Models, NLP, and Generative AI within an enterprise environment serving 200,000+ employees globally.
- Designed and tested prompt engineering workflows that reduced manual content review effort by approximately 30% in pilot use cases.
- Developed Python-based automation scripts to preprocess and route data through AI pipelines, improving workflow efficiency.
- Collaborated with cross-functional teams to translate business requirements into AI-driven technical solutions.

PROJECTS

BizPulse – Real-Time Business Analytics Platform | Team of 4

Aug – Nov 2025

Python · Docker · Apache Kafka · Zookeeper · PostgreSQL · MySQL · Metabase

- Architected and deployed an end-to-end real-time analytics platform integrating data ingestion, stream processing (Kafka), and visualization for small-to-medium businesses.
- Configured and orchestrated 5+ Docker containers (Zookeeper, Kafka, PostgreSQL, Metabase) managing inter-service communication and automated health monitoring.
- Built automated ETL pipelines that reduced manual data refresh time by ~40%, ensuring near-real-time dashboard updates for business stakeholders.
- Performed log management, system monitoring, and troubleshooting across distributed services, achieving 99%+ platform uptime during the project lifecycle.

E-Healthcare Management System | Team of 4

Aug – Nov 2024

MySQL · PHP · HTML/CSS · OOP · Queuing Theory

- Designed relational database schema and backend logic for a hospital management system handling 3 modules: bed availability, patient queuing, and multi-role admin workflows.
- Implemented database triggers and automated data consistency checks, reducing manual data entry errors by an estimated 35%.
- Developed operational dashboards and performed unit testing and debugging across all modules to validate data accuracy and system stability.

Price Comparison Browser Extension | Individual Project

Jul – Nov 2023

Python · BeautifulSoup · Selenium · JavaScript · REST APIs · Web Scraping

- Built a browser extension that scrapes and aggregates real-time product pricing from 5+ e-commerce platforms using Python (BeautifulSoup, Selenium).
- Engineered a data normalization and comparison engine surfacing price differences of up to 40% across platforms, helping users make informed purchasing decisions instantly.

- Delivered a clean JavaScript UI overlay on product pages with zero page-load performance degradation.

EDUCATION

B.Tech. – Computer Science & Engineering | MIT School of Computing 2022 – 2026

Expected Graduation: 2026 | Pune, Maharashtra

12th Standard 2021

Percentage: 80%

10th Standard 2019

Percentage: 81%

CERTIFICATIONS

AWS Certified Cloud Practitioner — Amazon Web Services | Cloud concepts, core services, security & compliance, pricing models

IBM Introduction to Data Analytics — Coursera | Score: 100/100

Python Training — IIT Bombay Spoken Tutorial | Score: 85/100

Java Training — IIT Bombay Spoken Tutorial | Score: 87.5/100

POSITIONS OF RESPONSIBILITY

Secretary – AWS Cloud Club | MIT ADT University Mar 2025 – Present

- Managed operations, documentation, and communication workflows for a 50+ member student technical community focused on cloud computing.
- Organized and led 10+ hands-on workshops on AWS services, cloud architecture, and system fundamentals, improving member technical readiness.
- Resolved technical issues for members and coordinated logistics for all club events, maintaining structured and consistent knowledge-sharing sessions.

Event Management Member – AWS Cloud Club | MIT ADT University 2024 – 2025

- Managed end-to-end technical event operations including system readiness, network setup, resource allocation, and demo environment configuration for 5+ events.
